BIKE BIB SHORTS PADDED MEN 4.0

MATCH THE PRODUCT! CAN IT COMPETE WITH X-BIONIC®?

1 THE TRICK®
Special knit structures along the spine simulate the overheating of the body. As a result, the brain kicks in with early sweat production, even before the body overheats. Early onset of sweating enables more effective cooling that protects power reserves.
Patented in 25 countries: AT, BE, CH, DE, DK, ES, FI, FR, GB, GR, IE, IT, LT, LU, LV, NL, PL, SE, SI, TR, IN, MX, RU, CN

2 SWEAT COLLECTOR
Where the body accumulates the most sweat, Sweat Collectors soak up the sweat and move it gradually through the thickened structures of the HydroPort yarn to Sweat Transporters.

3 ISO-PAD
Targeted insulation of individual body parts against ambient coldness can prevent the body from getting cold. This is why ISO-Pads over the hipbones retain body heat that is necessary to guarantee interior organ functionality.

4 3D BIONIC SPHERE® SYSTEM WITH THERMOSYPHON® TECHNOLOGY
Optimized through testing and empirical experience, the 3D Bionic Sphere® system with ThermoSyphon® technology stops unpleasant moisture and counteracts the danger of overheating or overcooling during rest and recovery phases. The cooling function begins as soon as your body heats up and starts to sweat.
3D Bionic Sphere® System is Patented in 29 countries: AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HU, IE, IT, LU, MC, NL, PT, SE, SI, SK, TR, AU, CA, CN, JP

5 ELASTIC STRAPS
The ergonomically shaped straps are wide to avoid pressure points and guarantee secure support.

6 SWEAT TRANSPORTER
Wrapping around the body, this system continuously transports excess sweat via channels to the zones where it can have the largest possible cooling effect on overheated muscles.

7 SWEAT COLLECTOR
Where the body accumulates the most sweat, Sweat Collectors soak up the sweat and move it gradually through the thickened structures of the HydroPort yarn to Sweat Transporters.

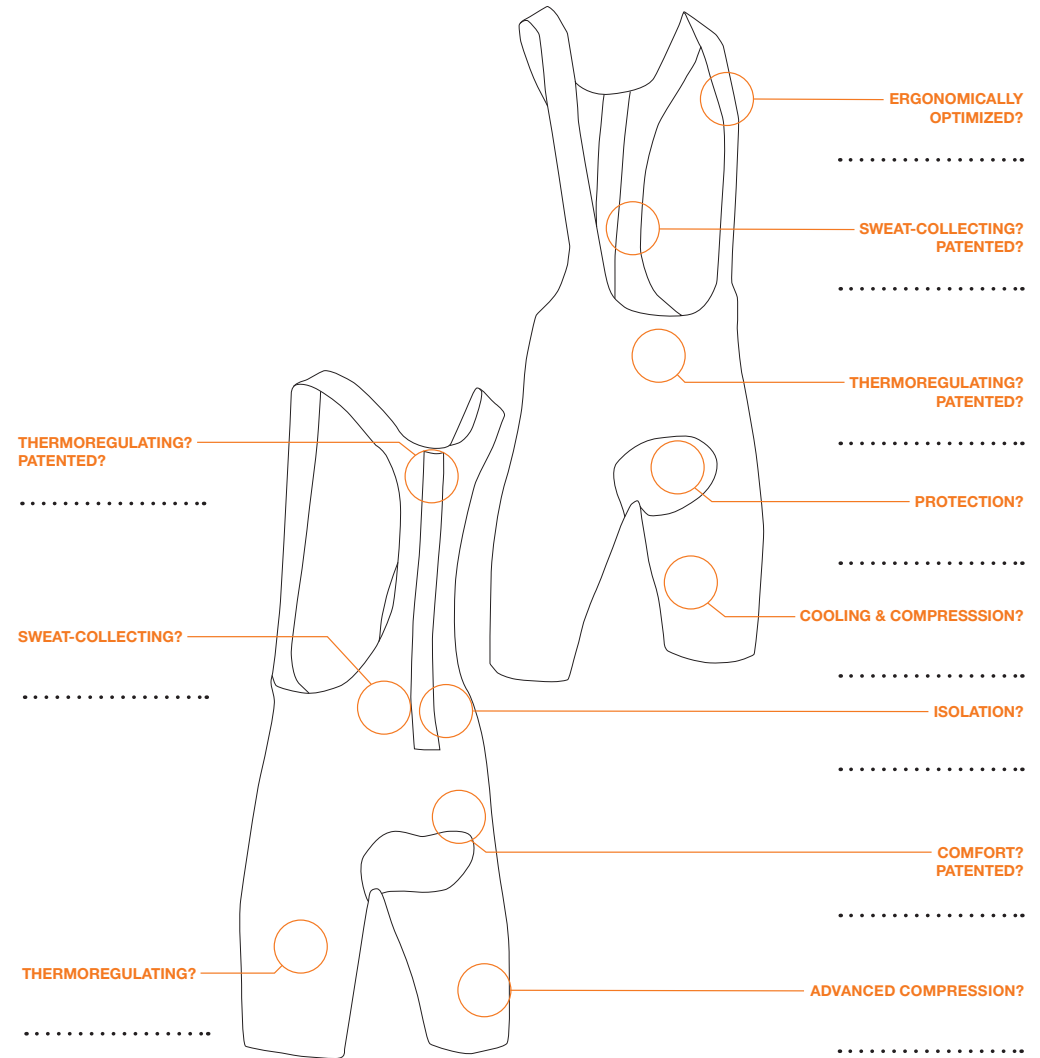

8 SWEAT TRAPS®
Designed to prevent dripping and to cool more effectively.
Patented in 22 countries: AT, BE, BG, CH, CZ, DE, DK, EE, ES, FI, FR, GB, GR, IE, IT, LU, NL, PT, SE, SI, SK, TR

9 SWEAT DISTRIBUTOR WITH PARTIALKOMPRESSION®
The combination of X-BIONIC® Partialkompression® and knit-in ridges collects excess sweat and allows it to evaporate over a broad area to provide extra cooling for heat-intensive muscle areas.

10 COMFORT^{4000FX} BIKE PAD
The ergonomically shaped pad with its optimally coordinated layered construction of knit fabrics and foam adapts to the body ideally and relieves sensitive blood vessels. With its ergonomically adapted 3D construction, the innovative surface layer absorbs sweat, wicks it away, and allows air to circulate over the entire sweat-intensive buttocks region – no more saddle sores.
Patented in 31 countries: AT, BE, CH, CZ, DE, DK, ES, FR, GB, GR, IT, LT, LU, NL, NO, PL, PT, SE, SI, SK, TR, AU, CA, CN, HK, JP, KR, MX, NZ, RU, US, ZA

11 X-BIONIC® PARTIALKOMPRESSION®
Partialkompression® on the legs combines two decisive performance advantages: improved muscular work thanks to compression, as well as optimal cooling thanks to the dispersal of pressure across the ridges.
Patented in 8 countries: AU, CA, JP, KR, MX, NZ, RU, ZA
