COMPARE**

> BIKE ZIP SHIRT MEN 4.0

1 DOLPHIN RIDER NECK
Ergonomically optimized and streamlined collar, based on typical position during cycling, to avoid helmet-collar-collisions.

2 ThermoSyphon® System, the next generation of the 3D Bionic Sphere® System
Experience the superior temperature management: ThermoSyphon uses the power of thermodynamics and combines it with gravity. While excess sweat seeps down, humid air is carried upwards by the vapour pressure. The new, y-shaped shape of the channels supports this function. Enlarged total surfaces, new and refined 3D structures optimize the interaction between warm and cold, between wet and dry.
3D Bionic Sphere® System is Patented in 29 countries: AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HU, IE, IT, LU, MC, NL, PT, SE, SI, SK, TR, AU, CA, CN, JP

3 AIRCOMPLEX-ZONE AT THE UPPER ABDOMEN
In the solar plexus, directly under the twelfth vertebrae of the thoracic region, important nerves receive signals that influence one's entire well-being. THE TRICK® Bike Shirt protects this sensitive area with special channels. Locked-in warm air insulates optimally in the cold. The system's structure processes excess sweat from physical activity and ensures appropriate coolness at the core.

4 IDEO-WAISTBAND
Ideally designed, ergonomically optimised. The ergonomically optimised waistband with higher cut in the back keeps the garment in place even during constant movements.

5 X-IMPACT TECHNOLOGY
Better performance due to grauated compression that reduces muscle oscillations, supports muscles and joints and optimises nutrient supply.

6 SWEAT TRAPS®
Designed for large underarm areas to prevent dripping and to cool more effectively.
Patented in 22 countries: AT, BE, BG, CH, CZ, DE, DK, EE, ES, FI, FR, GB, GR, IE, IT, LU, NL, PT, SE, SI, SK, TR

7 AIR-CONDITIONING CHANNEL®
The Air-Conditioning Channel® on the inside of arm dissipates heat at a controlled rate. The fine knitted structure immediately ducts moisture away.

8 THE TRICK®
Special knit structures along the spine simulate overheating of the body. As a result, the brain kicks in with early sweat production, even before the body overheats. Early onset of sweating enables more effective cooling that protects power reserves.
Patented in 25 countries: AT, BE, CH, DE, DK, ES, FI, FR, GB, GR, IE, IT, LT, LU, LV, NL, PL, SE, SI, TR, IN, MX, RU, CN

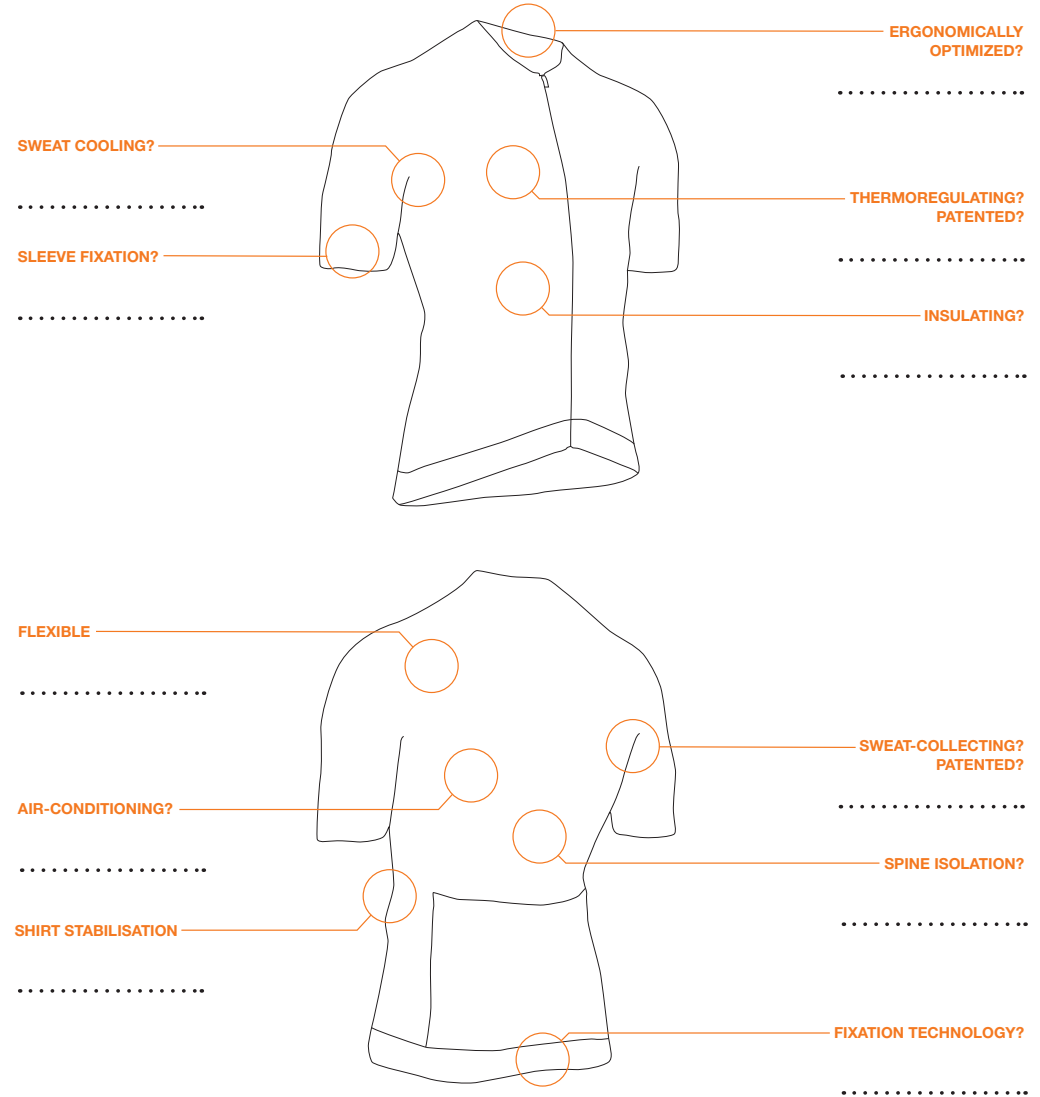

9 EXPANSION FLEX ZONE AT THE SHOULDER JOINT
Flexibility of the Expansion Flex Zone and the stretch of the yarn enable unrestricted movement. In addition, the Stretch Ribs allow a problem-free riding position in the shoulder area without pulling up the shirt. That guarantees all of the different technology stays where it belongs to optimally achieve intended function.

10 FIXATION RIBS
Fixation Ribs on the abdomen keep the shirt in the right position. They guarantee that THE TRICK® is positioned accurately on the back and can unleash its full effect.

11 STABILITY ZONE
The Stability Zone keeps the shirt in the right place and prevents uncomfortable riding up during dynamic torso movement.

12 IDEO-WAISTBAND
Ideally designed, ergonomically optimised. The ergonomically optimised waistband with higher cut in the back keeps the garment in place even during constant movements.

> MATCH THE PRODUCT! CAN IT COMPETE WITH X-BIONIC®?

**MOST FUNCTIONAL. MOST AWARDED.
NEVER BEATEN.**
