X-BIONIC®
TWYCE

> BIKE ZIP SHIRT WOMEN 4.0

1 DOLPHIN RIDER NECK
Ergonomically optimized and streamlined collar, based on typical position during cycling, to avoid helmet-collar-collisions.

2 X-BIONIC® TWYCE® COOL ZONE
Hydrophilic and hydrophobic fibres collect excess sweat from the ThermoSyphon® System and allow it to evaporate over a broad area to provide extra cooling.

3 200 % ENLARGED 3D BIONIC SPHERE® SYSTEM WITH THERMOSYPHON® TECHNOLOGY
Increased cooling performance thanks to strategically positioned areas on the chest and back. Optimised through testing and real-world experience, the 3D Bionic Sphere® System stops unpleasant humidity and the risk of overheating or chilling during rest and recuperation phases. Once your body heats up and begins to sweat, the cooling function is activated.

3D Bionic Sphere® System is patented in 29 countries: AT, BE, BG, CH, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HU, IE, IT, LU, MC, NL, PT, SE, SI, SK, TR, AU, CA, CN, JP

4 SWEAT TRAPS®
Designed for large underarm areas to prevent dripping and to cool more effectively.
Patented in 22 countries: AT, BE, BG, CH, CZ, DE, DK, EE, ES, FI, FR, GB, GR, IE, IT, LU, NL, PT, SE, SI, SK, TR

5 AIRCOMPLEX-ZONE
At the solar plexus, directly under the 12th thoracic vertebra, important nerve fibres receive signals that influence the body's entire wellbeing. This sensitive area is protected with special channels. Warm air enclosed there insulates optimally in the cold. The system's structure processes excess sweat from physical activity and ensures appropriate cooling of the core.

9 85° TECHNOLOGY SLEEVE
Anatomically shaped sleeve, adapted to bike position.

10 FLEXOR ARM CUFF
Asymmetrical arm cuff to avoid unpleasant sleeve movement.

11 FIXATION RIBS
Fixation Ribs on the abdomen keep the shirt in the right position. They guarantee that THE TRICK® is positioned accurately on the back and can unleash its full effect.

12 EASY ACCESS POCKETS
The practical rear pockets are positioned to provide maximum accessibility without restricting the cyclist's freedom of movement. Also designed with elasticised tops so that contents are not jolted out over rough terrain.

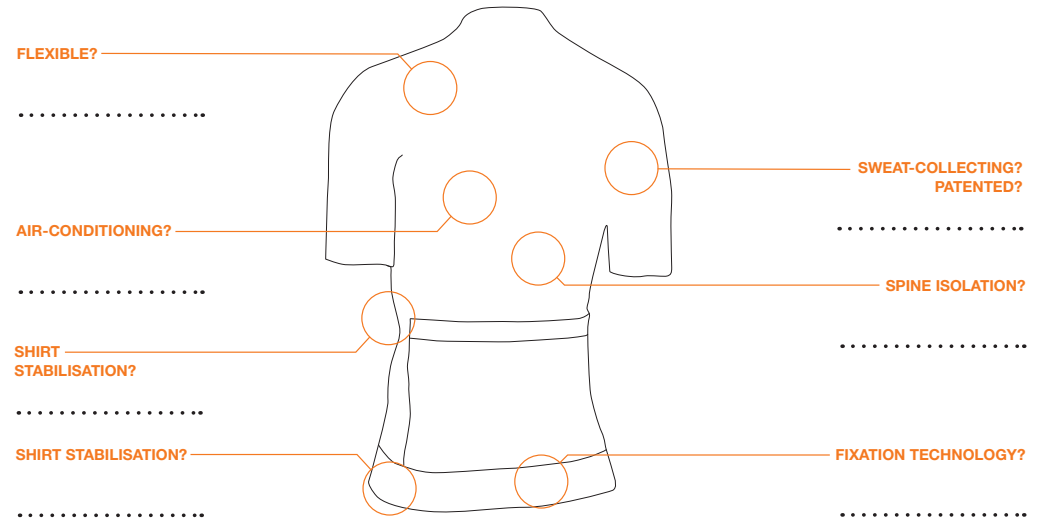

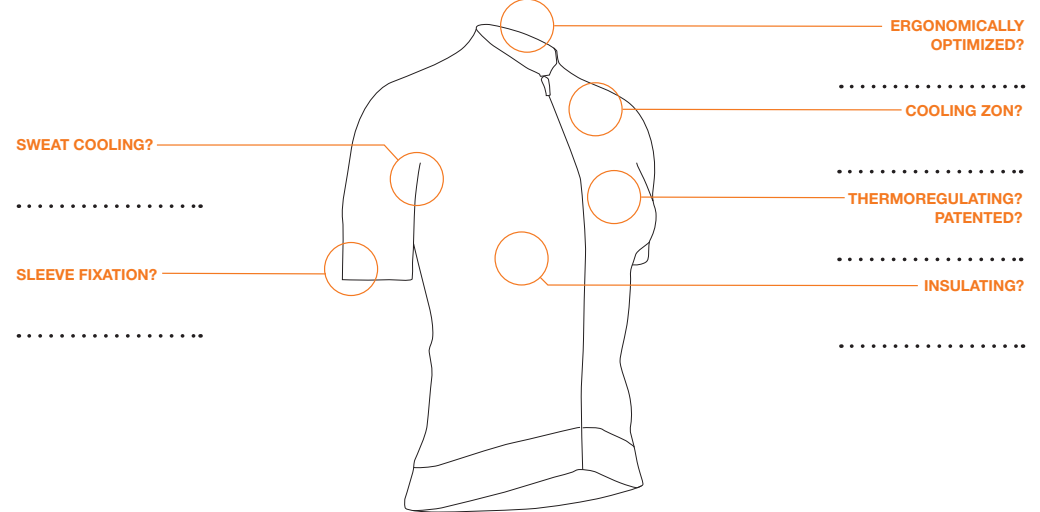

13 IDEO-WAISTBAND
Ideally designed, ergonomically optimised. The ergonomically optimised waistband with higher cut in the back keeps the garment in place even during constant movements.

6 AIR-CONDITIONING CHANNEL®
The Air-Conditioning Channel® on the inside of arm dissipates heat at a controlled rate. The fine knitted structure immediately ducts moisture away.

7 POCKET STABILIZER
Special knitting structure stabilises the pockets.

8 AKTIV-BUND
Keeps the shirt from slipping up or constricting.

> MATCH THE PRODUCT! CAN IT COMPETE WITH X-BIONIC®?

**MOST FUNCTIONAL. MOST AWARDED.
NEVER BEATEN.**
