X-BIONIC®  
**TWYCE**

# > RUN SHORTS MEN 4.0

**1 X-BIONIC® TWYCE® COOL ZONE**  
Hydrophilic and hydrophobic fibres collect excess sweat from the ThermoSyphon® System and allow it to evaporate over a broad area to provide extra cooling.

**2 3D BIONIC SPHERE® SYSTEM WITH THERMOSYPHON® TECHNOLOGY**  
Optimized through testing and empirical experience, the 3D Bionic Sphere® system with ThermoSyphon® technology stops unpleasant moisture and counteracts the danger of overheating or overcooling during rest and recovery phases. The cooling function begins as soon as your body heats up and starts to sweat.

3D Bionic Sphere® System is Patented in 29 countries: AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HU, IE, IT, LU, MC, NL, PT, SE, SI, SK, TR, AU, CA, CN, JP

**3 INNERLAP AIRCONDITIONING ZONE®**  
The inner thighs are less reactive to the cold in terms of muscle performance. This is where the Innerlap AirConditioning Zone® is placed. It is a fine network of knitted fabric with the ZERO-Insulation Zone. That's how cooling via air exchange is made possible. As soon as sweat develops, the cooling function increases since this process is in direct contact with the skin.

**4 AIR-CONDITIONING CHANNEL®**  
Is a ventilation system of channels that wrap around the body, continuously carrying away moisture and warmth. It allows air to flow to body regions not normally accessible by fresh air circulation.

**5 ISO-PAD**  
Targeted insulation of individual body parts against ambient coldness can prevent the body from getting cold. This is why ISO-Pads over the hipbones retain body heat that is necessary to guarantee interior organ functionality.

**6 INTELLIYARNS®**  
IntelliYarns® are protected X-BIONIC® high-tech yarns with special functions. Depending on their composition, they accelerate moisture transport, dampen shocks, increase the cooling effect or stop bacteria and odours.

**7 IDEO-WAISTBAND**  
Ideally designed, ergonomically optimised. The ergonomically optimised waistband with higher cut in the back keeps the garment in place even during constant movements

**8 SMART PHONE POCKET**  
Pocket for e.g. an iPhone.

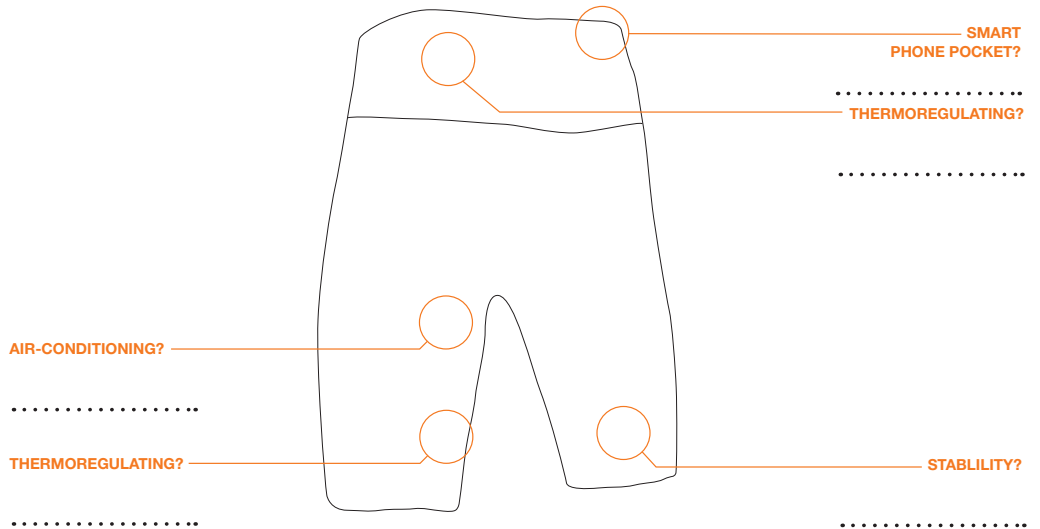

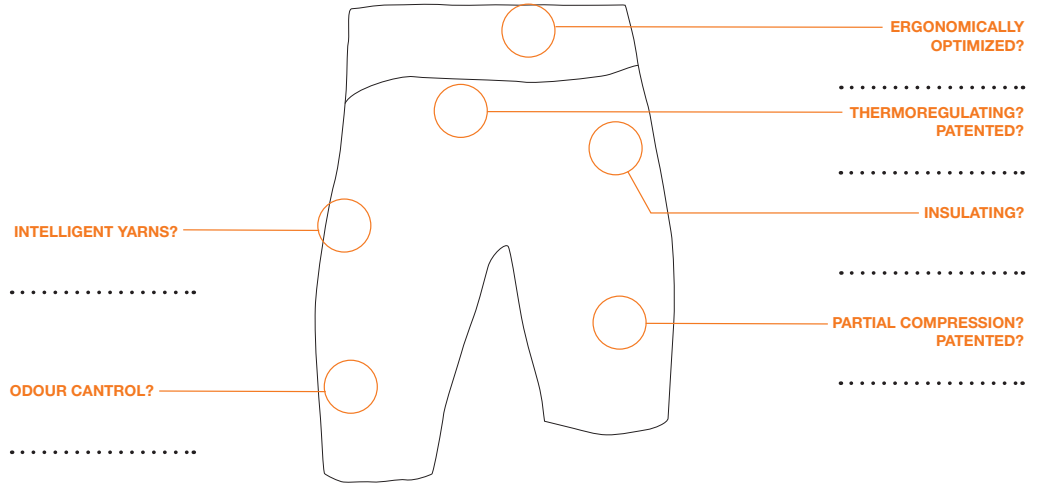

**9 NEURAL-RESPONSE-BANDAGE**  
The Neural-Response-Bandage exerts targeted pressure on the muscle attachment, prepares the receptors for action and improves the work of the muscles.

**10 X-BIONIC® PARTIALKOMPRESSION®**  
Partialkompression® on the legs combines two decisive performance advantages: improved muscular work thanks to compression, as well as optimal cooling thanks to the dispersal of pressure across the ridges.  
Patented in 8 countries: AU, CA, JP, KR, MX, NZ, RU, ZA

**11 SKIN NODOR®**  
High-tech down to the smallest molecule. Reduces bacterial growth - reduces odour formation. The skin-neutral ions released by Skin Nodor® are active against bacteria formation and thus reduce odour formation.

# > MATCH THE PRODUCT! CAN IT COMPETE WITH X-BIONIC®?

**MOST FUNCTIONAL. MOST AWARDED.  
NEVER BEATEN.**
